

Amended Resolution

*proposed by the ad-hoc Ikaria Environmental Impact Committee and
adopted by the Supreme Convention body of the Pan-Icarian Brotherhood of America
on Sunday, September 4, 2011*

RESOLVED that, in response to the storms that devastated the western part of Ikaria in October, 2010:

- 1) A working group will be established to oversee and implement the purchase of a biological compact sewage treatment unit (the “biological compact”) for the village of Karkinagri, Ikaria. The working group will be responsible for overseeing fundraising efforts, coordinating the purchase of the biological compact with the appropriate individuals in Greece, accounting for funds spent and reporting back to the full Supreme Lodge, the full Foundation Board and the Supreme Convention body at the 2012 Supreme Convention in Myrtle Beach. The working group will be comprised of four (4) individuals: one (1) individual appointed by the Supreme Lodge; one (1) individual appointed by the Foundation board; one (1) individual appointed by the Syllogo Kavos Papa in Athens; and one (1) independent representative from Ikaria.
- 2) A fundraising drive will be started immediately to solicit individual donations from members of the Brotherhood and individual chapters of the Brotherhood to purchase the biological compact. Members/chapters will be instructed to send individual donations directly to the Foundation with a notation that the donation is to go toward the purchase of the biological compact.
- 3) The Foundation will match dollar-for-dollar all individual and chapter donations received with respect to the biological compact, up to a maximum of \$50,000. For example, if individual donations equal \$25,000 in the aggregate, the Foundation will contribute \$25,000 toward the purchase of the biological compact; if individual donations equal \$50,000 in the aggregate, the Foundation will contribute \$50,000 toward the purchase of the biological compact; and if individual donations equal \$100,000 in the aggregate, the Foundation will contribute \$50,000 toward the purchase of the biological compact.
- 4) In the unlikely event that the Greek government provides funding for the biological compact or more funds are raised than are actually needed for the purchase of the biological compact, the working group will work with the Syllogo Kavos Papa and the mayor of Ikaria to determine the next most pressing need in the western part of Ikaria as a result of the storm damage to ensure that all funds raised are appropriately spent.
